Additional Notes:

Guyana Nature Experience 2012

This classic group adventure takes in many of the highlights of Guyana: visit Kaieteur and Orinduik Falls before travelling to Iwokrama for jungle hikes, boat trips, the Iwokrama Canopy Walkway, and the chance to see the elusive jaguar. Stay in the Makushi village of Surama before going into the savannahs in search of giant river otters, giant anteaters and black caiman. This is our most popular tour and has ten scheduled departures in 2012.

Day 1 - Arrive

Arrive in Guyana. Transfer to Georgetown.

Overnight at Cara Lodge

Day 2 - Kaieteur and Orinduik Falls

Today enjoy a trip to Kaieteur Falls and Orinduik Falls.

Overnight at Cara Lodge

Day 3 - Fly to Annai Village and drive to Iwokrama

0915hrs transfer to Ogle Airstrip for a flight across the rainforest to Annai. Lunch at Rock View Lodge and then transfer by 4x4 vehicle or 4x4 Bedford Truck (converted with forward facing seats and canopy) to Iwokrama River Lodge. The Iwokrama Rainforest is a vast wilderness of one million acres. This protected area was established in 1996 as the Iwokrama International Centre for Rainforest Conservation and Development. The Iwokrama Forest is in the heart of one of four last untouched tropical forests of the world - The Guiana Shield of North-Eastern South America. Iwokrama was established as a living laboratory for tropical forest management because the unsustainable utilisation of these forests will result in the extinction of half the world's plant and animal species and unknown changes to global climate. This is a protected area with a difference - the full involvement of people. Iwokrama is exceptional among conservation organizations because it joins with local people in every aspect of its work. From research to business, Iwokrama ensures local economic and social benefits from forest use and conservation. The Forest is in the homeland of the Makushi people, who have lived here and used the forest for thousands of years. People are a vertical part of the ecosystem. The success of Iwokrama relies on the ownership of local people and the combined skills of specialists and communities. Iwokrama does what so many International conventions have acknowledged as best practice. It has begun conservation locally and integrated conservation into national development. Afternoon free to explore the trails around the river lodge with an Iwokrama Ranger. Iwokrama is home to many bird species including Capuchinbird, Black Nunbird, Chestnut-rumped Woodcreeper, Amazonian Antshrike, Brown-bellied Antwren, Spot-tailed Antwren, Todd's Antwren, Spotted Puffbird, Guianan Cock-of-the-rock, Green Aracari, Guianan Toucanet, Guianan Red Cotinga, Pompadour Cotinga, Rufous-crowned Elaenia, Bronzy Jacamar, Chestnut & Waved Woodpecker, Gray Antbird, and Strong-billed Woodcreeper. Three other Neotropical species in the Iwokrama forest of high interest are White-winged Potoo, Rufous Potoo, and Rufous-winged Ground-cuckoo. Finally, after dark, we'll set out on the river, in hopes of finding one or another of its four species of caiman, and listen for nightbirds such as Spectacled Owl, White-winged Potoo, Rufous Potoo, Long-tailed Potoo, Zigzag Heron or Blackish Nightjar. You may see one or another of the four species of caiman, and most certainly snakes including Cox boa, tree frogs and if lucky maybe some mammals. Maybe even a puma or capybara.

Overnight at Iwokrama River Lodge

Day 4 - Climb Turtle Mountain & Area Treks

Making an early start we will embark on the Essequibo and circumnavigate Indian House Island giving us a chance for dawn song on the river including five species of Tinamou, Marbled Wood-Quail, Band-rumped Swift, White-banded and Black-collared Swallows, and Guianan Streaked-Antwren before returning to the River Lodge for breakfast. After breakfast, you will leave the river lodge for the journey to Turtle Mountain, and an exhilarating climb up the mountain to its summit at 935ft (approx. 360m). It takes 1 3/4hrs to walk up the mountain, but the effort is more than worth it for the breathtaking views over the forest canopy when you get there and chances of Green Aracari, White Bellbird or a fly-by of one of five types of Eagles. This trail is also a great location for seeing Black Spider Monkey and Red Howler Monkey and if we are very lucky even a Jaguar. This pristine forest offers huge buttress trees and the endemic Greenheart, a highly sought after hardwood. Return to the River Lodge for lunch. As the afternoon cools you set out on a boat trip to visit Kurupukari Falls to see

the Amerindian petroglyphs (dependent on the water level). Then visit the small Amerindian village of Fair View where you can experience the process and use of cassava, the staple of the Amerindian diet. We will visit the Butterfly Farm where butterflies are bred for export.

Overnight at Iwokrama River Lodge

Day 5 - Jaguar Drive and Visit Canopy Walkway

At dawn take a wildlife walk with an Iwokrama Ranger close to the River Lodge. After breakfast we will transfer you by 4 x 4 along the trail that is one of the best places to see the elusive Jaguar. The Iwokrama forest is rapidly gaining an international reputation for its healthy jaguar populations that seem not to be troubled by the appearance of curious humans. No promises, but many have been lucky! Along the road, we will watch for the myriad of bird species that frequent the forest edge, including Crimson and Purple-necked Fruit-crow, Crimson Topaz, Green Oropendula, Spotted and Guianan Puffbird, Scarlet and Red-and-Green Macaw, Blue-cheeked and Orange-winged Parrot and Gray-winged Trumpeter. This road is the only north – south access in Guyana and links the country to Brazil. Even so traffic is only very occasional and wildlife is often seen along the road, such as Agouti, Tayra, Puma, Tapir and Black Curassow. The journey concludes at the Iwokrama Canopy Walkway where we can bird watch from the vantage of 35 Metres up in the canopy. Painted Parakeet, Rufous-throated Sapphire, Guianan Puffbird, Green Aracari, Waved Woodpecker, Pygmy Antwren, Guianan Streaked-Antwren, Dusky Purpletuff, Purple-breasted Cotinga, Guianan Toucanet, Pompadour Cotinga, Buff-cheeked Greenlet, Caica Parrots, and a host of crown specialists may come within our view. From this tree top vantage you can sometimes see Red Howler Monkeys and Black Spider Monkeys. The trails also have an interpretative walk with the trees named and you can learn about their varied uses in the Macushi culture. Deer and agouti are also regular visitors to the lodge. As dark falls on the Canopy Walkway, we will hope to see the White-winged Potoo.

Overnight at Atta Rainforest Lodge

Day 6 - Dawn on Canopy; Drive to Surama Village

Welcome the dawn chorus from the canopy walkway. Short-tailed Nighthawks settle in for the day, Swifts take to the sky, White throated and Channel-billed Toucans yodel, and Barred Forest Falcons call. The unusually timid Black Curassow can also be seen as at least one family party has become habituated and regularly feeds in the clearing of Atta Rainforest Lodge. After breakfast travel by 4x4 vehicle or 4x4 Bedford Truck (convert with forward facing seats and canopy) to a trail in the Iwokrama Forest to hopefully see the amazingly brilliant Guianian Cock-of-the-rock. This trail is through interesting forest and the guides can show the use of the plants. Continue your trip onto the Amerindian village of Surama. The village is set in five square miles of savannah and surrounded by the densely forested Pakaraima Mountains. Surama's inhabitants are mainly from the Macushi tribe and still observe many of the traditional practices of their forebears. On arrival in Surama receive a welcome from a village counsellor and settle into your accommodation. Your guide will take you on a tour of the village. Visit the local school, medical centre and church along with some of the village houses. As the afternoon cools a local guide will escort you for a short walk on trails to observe the forest and bird life. See the forest through the eyes of your indigenous guide and learn about the medicinal plants and their uses in the Amerindian culture. Tonight enjoy an educational walk to observe wildlife and experience the mystique of the forest after dark.

Overnight at Surama Eco-Lodge

Day 7 - Climb Surama Mountain; Borro Borro River

Rise before dawn for a walk across the savannah and then the exhilarating climb up Surama Mountain in the cool morning air. This is the best time to observe bird life along the trail. Breakfast will be served at a lookout point which affords incredible views across the village and savannah to the Pakaraima Mountains. Return to village for lunch and then take a three mile walk across the savannah and through the rainforest to the Burro Burro River. Your guides will then paddle you on the Burro Burro River for opportunities to observe Giant River Otters, Tapir, Tira, Spider Monkeys and many more species. Return to village for sunset.

Overnight at Surama Eco-Lodge

Day 8 - Drive to Annai Village & Rupununi Savannahs

After breakfast depart Surama by 4x4 vehicle or 4x4 Bedford Truck for Rock View Lodge at Annai. The road travels through the savannah and the foothills of the Pakaraima Mountains with excellent opportunity for savannah birding. Jabiru Stork are often seen along this stretch of road. Eventually we reach the Rupununi and Annai, its northernmost community. The Rupununi Savannah is to Guyana what the Gran Sabana is to Venezuela, an extensive area of grassland with termite mounds and scattered or riparian woodland. It differs in that much of it is devoted to cattle raising, though the large ranches are not very productive. Indeed, one can travel for hours without seeing a domestic animal of any sort. Needless to say, the birdlife here is markedly different from that of the rainforest. Rock View Lodge is located where the savannah meets the forest-covered foothills of the Pakaraima Mountains. With its tropical gardens and flowering trees, the lodge resembles an oasis in the savannah, and attracts many species of birds, particularly nectar feeders and frugivores. Nearby patches of light forest are home to certain ant birds and flycatchers, and of course the grasslands support an avifauna of their own.

Overnight at Rock View Lodge

Day 9 - Birdwatching on the Savannah

At dawn take a hike in the foothills of the Pakaraima Mountains on the Panorama Trail where you might see Cinereous Mourner, Finsch's Euphonia, Reddish Hermit, Rufous-bellied Antwren, Green-tailed and Yellow-billed Jacamar. The views across the savannah and villages as the sun rises are spectacular. Today you can visit nearby Amerindian villages. Enjoy an explanation and demonstration of traditional cashew nut roasting. Finish the day with drinks around the pool.

Overnight at Rock View Lodge

Day 10 - Float on Rupununi River to Karanambu Ranch

After breakfast transfer by 4x4 vehicle or 4x4 Bedford Truck along the road through the savannah and at the foothills of the Pakaraima Mountains. Jabiru Stork and Toco Toucan are often seen along this stretch of road, as are Red Howler and Spider Monkey. From Ginep Landing we take a boat trip on the Rupununi River to Karanambu Ranch. Depending on the river level, this trip offers an excellent opportunity to look for Giant Otters as there are several family groups which live along this stretch of the Rupununi River. The journey ends at Karanambu Ranch, the home of Diane McTurk, widely known for her work in rehabilitating orphaned, giant river otters. Diane and her otters have appeared on National Geographic, Jeff Corwin Experience, Really Wild Show (BBC) and the Calgary's "Zoo World". Karanambu has a long history of visiting naturalists and Diane's father, Tiny McTurk, has welcomed David Attenborough and Gerald Durrell (Three Singles to Adventure). Diane sometimes has resident orphaned otters and you can help her as she tends to them. Late in the afternoon we will travel by boat to look for wild Giant River Otters and as dusk falls to the ponds to see the giant Victoria Regis waterlily, bloom at dusk. On the return trip we will spotlight for Black Caiman and birds and creatures of the night. Dinner with Diane will include stories on the history of the family and the Rupununi Savannahs.

Overnight at Karanambu Ranch

Day 11 - Giant River Otters and More at Karanambu

Diane sometimes has resident orphaned otters and you can help her as she tends to them. You can visit Simoni Pond for some of the best inland fishing in Guyana including Peacock Bass or explore the flooded forest or savannah. An evening visit to Crane Pond to see hundreds of Ibis, Anhinga, Heron and Egret roosting is a highlight. If you are interested in birdwatching you can explore woodland patches or gallery forest along the river where we'll hope to find such species as Spotted Puffbird, Striped Woodcreeper, Pale-bellied Tyrant-Manakin, Golden-spangled Piculet, Bearded Tachuri and Capuchinbird. When water levels are appropriate a wooded swamp near the ranch is the site of a surprisingly large colony of Boat-billed Herons, as well as several species of Egrets, Anhingas and Wattled Jacarnas. A feature bird for the area is Agami Heron.

Overnight at Karanambu Ranch

Day 12 - Caiman Capture Project at Yupukari

This morning travel out onto the savannah to search for a Giant Anteater. Explore the Rupununi River in search of wild Giant River Otters, Black Caiman and Arapaima. After breakfast transfer by boat, birdwatching along the way, to the Amerindian village of Yupukari and Caiman House. Caiman House is the hub of several participatory development projects, including the introduction of classroom libraries in all three village schools and an internet-enabled public library. Visitors may have the opportunity to meet local craftspeople, including the furniture builders at Yupukari Crafters, a nonprofit venture to create village jobs and generate income to sustain educational development. Tonight enjoy a foray on the Rupununi River from Caiman House Field Station. As a guest you have the unique opportunity to support and participate in an ongoing field study of the Black Caiman (*melanosuchus niger*), the largest member of the alligator family and an endangered species. Guests will observe the capture from a separate boat, but will be offered the opportunity to assist in data collection. Caiman are weighed, measured, sexed and tagged before being released back into the river. The research has already discovered interesting information on caimans' nests that was previously unknown. During periods of high water it is difficult to capture Caiman to you will have another chance to enter the nocturnal world of the Rupununi River and associated gallery forests which offer an experience, and world of wildlife entirely different than those viewed on a day trip. Skilled guides will expertly escort visitors to meet elusive denizens of darkness by outboard powered boats, while interpreting the sights, and sounds of Guyana after dark. Just after darkness settles on the River many creatures emerge such as black caiman (to over 12 feet), spectacled caiman, tree boas, iguanas, frogs, and many fish species (i.e. arrawana, piranha). Sleeping birds (kingfishers, small perching birds) nightjars, potoos, Boat-billed Herons and other aquatic birds, bats, (harmless) spiders, insects, moths, and more can be closely approached in way not possible during the hours of light. Less likely, but not rare inclusions for night viewing include possums, tree dwelling rodents, capybara and sleeping monkeys (esp. squirrel monkeys) amongst other mammals. Few nights pass without some unusual offering.

Overnight at Caiman House & Research Center

Day 13 - Fly to Georgetown; City Tour

This morning we will have some time to visit the village, to learn about their way of life. Or go birdwatching in search of the many good savannah, gallery forest and river-edge birds found in the Caiman House area including Pinnated Bittern, Green-tailed Jacamar, Black-chinned Antbird and Capuchinbird. After an early lunch take a flight back to Georgetown. Enjoy an afternoon Georgetown City Tour.

Day 14 - Depart

Transfer to the airport for your departing flight.
